Focus the device's camera directly onto the barcode. There is no need to capture the complete card.

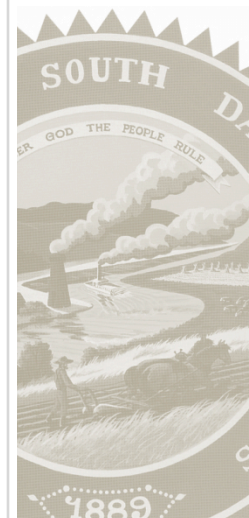

Instructions:

- 1) **Place your camera 6 inches or so above your card** (it's best to set your device on a on a fixture, e.g., a box). Older devices, iPad 2's for example, have issues focusing if the focal point is too close to the lens.
- 2) Zoom in on the barcode until it is roughly centered and fills 50 to 75 percent of the length of the screen on your device.
- 3) The barcode **MUST** be clear in the image and free of any hot spots (glare from lights).
- 4) **If you end up here again after pressing login, the system didn't recognize your barcode**, so please try again. Common errors are that the barcode is not clear enough (shaky hands) or large enough (no zoom).
